

TSVETAN MARKOV

Junior Web Developer | JavaScript | React

+359 899820540
<https://github.com/Markowcvetan> , <https://github.com/TpMarkov>
Lovech, Bulgaria open to relocation

SUMMARY

Motivated junior web developer with hands-on experience in HTML, CSS, and JavaScript. Passionate about continuous learning and growing as a programmer. Gained practical skills through the Telerik Academy, working on collaborative team projects that simulate real-world development environments. Eager to contribute to dynamic teams and take on new challenges in web development.

EXPERIENCE

NodeBase Workflow Platform 2025
[Personal Project](#) Lovech, Bulgaria

Live Demo: <https://nodebase-workflow.vercel.app/>
GitHub: <https://github.com/TpMarkov/nodebase/tree/main>

Tech Stack: Next.js 16, TypeScript, Node.js, PostgreSQL, Prisma, Inngest, React Flow, Tailwind CSS v4, Shadcn UI, Better-Auth, AI SDKs

- Developed a full-stack workflow automation platform featuring a visual drag-and-drop editor for building complex business processes with conditional logic, loops, and external API integrations.
- Implemented an event-driven backend using Inngest to reliably execute and monitor long-running background jobs and asynchronous workflows.
- Designed a secure authentication and credential management system using Better-Auth to safely handle user secrets and API keys.
- Built a modern, responsive dashboard with real-time workflow execution monitoring, logs, and status visualization using React Flow and Tailwind CSS.

Vibe Coding Assistant 2025
[Personal Project](#) Lovech, Bulgaria

Live Demo: <https://vibe-eta-orpin.vercel.app/>
GitHub: <https://github.com/TpMarkov/vibe/tree/master>

Tech Stack: Next.js 15, TypeScript, Tailwind CSS, Prisma, tRPC, Clerk (Auth), Inngest, ShadCn UI, Vercel

- Developed an AI-powered web platform that enables users to generate full-stack web applications using natural language prompts, accelerating MVP and prototype development.
- Built a scalable **Next.js App Router** architecture with a **type-safe tRPC API layer** for efficient frontend-backend communication.
- Implemented **agent-based AI workflows** using Inngest to interpret user intent, generate code files, and manage background jobs.
- Designed a modern, responsive user interface using **Tailwind CSS** and **Radix UI**, focusing on accessibility and user experience.
- Managed database schemas and application data using **Prisma**, and integrated **Clerk authentication** for secure user access.

Signalist Stock Market 2025
[Personal Project](#) Lovech, Bulgaria

Live Demo: <https://signalist-stock-market.vercel.app/>
GitHub: <https://github.com/TpMarkov/liveStock>

Tech Stack: Next.js 16, TypeScript, MongoDB, Tailwind CSS, TradingView, Better-Auth

- Developed a real-time stock market analytics web application providing live market overviews, stock heatmaps, and financial news timelines.
- Integrated TradingView widgets to deliver interactive, high-performance financial data visualization for traders and investors.
- Implemented secure user authentication using Better-Auth and managed user and application data with MongoDB and Mongoose.
- Designed a modern, fully responsive user interface using Tailwind CSS 4 and Shadcn/UI components to enhance readability and usability across devices.

EDUCATION

Alpha JavaScript Track
Telerik Academy
01/2025 - 06/2025

Bachelor in Logistics
National Military University Veliko Turnovo
2011 - 2014

Foreign Languages High School
Exarch Joseph the First
2006 - 2011

SKILLS

JavaScript (ES6+) · React basic Chakra UI ·
Node JS basic Express basic MongoDB basic Firebase
HTML CSS

CERTIFICATION

Programming fundamentals with JavaScript
Software university

HTML and CSS
Software University

JS Advanced
Software University

INTERESTS

💎 I'm passionate about building responsive, user-friendly websites using modern tools like React.

💎 A self-driven learner combining self-study and bootcamp experience, I'm always eager to grow my skills – with the long-term goal of becoming a full-stack developer.

EXPERIENCE

NextPro Blog Platform2025

Personal ProjectLovech, Bulgaria

Live Demo: <https://nextpro-blog.vercel.app>

GitHub: <https://github.com/TpMarkov/nextjs16-blog>

- Tech Stack: Next.js 16, React 19, Convex DB, TypeScript, Tailwind CSS, Prisma, PostgreSQL.
- Built a responsive, "premium-feel" UI using Tailwind CSS v4 and Radix UI/Shadcn components, featuring dark mode and smooth Framer Motion animations.
 - Integrated secure authentication using Better Auth.
 - Engineered a seamless content creation workflow with a rich text editor and image handling.
 - Optimized for performance and SEO, achieving fast load times and excellent core web vitals.

Giphy-App2025

<https://github.com/Web-Project-Giphy/Giphy.git>Lovech, Bulgaria

- Tech Stack:** Vanilla JavaScript, Firebase, HTML/CSS
- Increased user engagement by {30%} by developing a web app with the Giphy API for trending GIFs.
 - Implemented **user authentication** using Firebase, allowing users to register, log in, and manage their accounts.
 - Contributed to the **user profile experience**, including adding favorite GIFs and managing personal preferences.
 - Designed UI elements and components, enhancing user experience and consistency across views.
 - Practiced collaboration through GitHub, contributing to codebase management and feature development within a team setting.
